

## INTERVIEW WITH STUDENTS

TOPIC: Is waste a problem or a resource?

group members: (Italy Giuseppe Zucco, Alessandro Torromino, Lorenzo Sansone) (Croatia Ivan Nevečerel, Dora Jambrušić, Anja Vicković) (Lithuania Ignas Narbutas, Tadas Aržuolaitis, Elvijus Bartkus) (Romania Amalia Ducu and Paula Munteanu)

Who or what do you think produces the most waste?

### Student 1.

I believe humans during the holidays because they buy a lot of stuff and they throw away everything and don't use it actually, just waste a bunch of food and things in general. – Oniga Laura

### Student 2.

In my opinion, most waste is produced by people with no interest in sustainability and nature. Also, I think that people who are greedy and want only money cause a big problem. For them, profit is the only thing they care about. – Tonko Brebrić

As an individual, can you reuse the waste you make and will you make a change by doing the right thing?

### Student 1.

Yes, we can use old clothes to make something new and use them in different ways, use bottles to make decorations, just be crafty, smart and eco-friendly. I think every baby step we make can be a big step for humanity. – Oniga

### Student 2.

Of course, it may not appear that a person can accomplish much, but with a positive attitude and the belief that if everyone does just one thing, there will be a significant improvement. – Tonko

How much time do you think we have left to fix these waste-related problems?

### Student 1.

It doesn't really depend on time, it depends on how many people do it, because we have to do it constantly to keep us safe. We can't just do it for ten years and then stop, we have to start now and keep doing it, educate every generation to keep doing it in a better way. – Oniga

### Student 2.

I don't think we have that much time. Pollution is a problem now, and if we wait any longer, we will make irreversible changes. If we try to make the smallest of changes, our future generations will not have to worry about the environment and all of the issues pollution causes. - Tonko
