Prodromos Charalampous

C01

Institute: Sxoli Omodous

- At home, I chose to study in depth The Internet of things.
- Studying at home on my own was not a too hard work, because I think it was very easy to learn about something of that interest. I guess it was a very nice and interesting topic and thanks to Mr Alex, I found out the existence of this topic!!
- As far as it concerns the interactive activity in the classroom it was a very nice experience and I enjoyed it. It was funny because it was like filming a movie. We also had the opportunity to share what we learned at home.
