

ERASMUS

- Through the project, a greater collaboration has developed between the comrades, which for this situation has been quite favorable for greater integration, thus determining the development in our creativity.
- The most interesting work done so far has been the elevator pitch, as it introduced an innovative activity, thus highlighting a theme that today is more relevant than ever and that should be disclosed above all to young people, in such a way as to understand the importance of our planet, which today is not respected by those who do not realize the enormous gravity of the situation.
- In our opinion, the recycling of clothes is one of the most correct choices for a right activity aimed at sustainability.

In fact, nowadays, fashion is one of the essential elements of our life, and millions of clothes are thrown away causing the development of pollution, so we commend, especially to the youngest, a greater attention in their compartments, since these could be distracting for our environment, accordingly the use of wool and cashmere clothes, considered the least polluting, is strongly recommended.
